

# Health and Safety management training

## IOSH Managing Safely

We are licensed by the Institution of Occupational Safety and Health (IOSH) to provide this essential course. Our team of consultants are qualified and approved to deliver this valuable training.

### What will I get from this course?

Successful completion of the training, and end-of-course assessment, results in a nationally recognised qualification in health and safety management.

The course is recognised as the 'market leader' in health and safety training for front-line managers and supervisors. It provides the opportunity for delegates to gain:

- A nationally recognised qualification in health and safety management
- An improved understanding and awareness of health and safety risk management and management responsibilities
- Knowledge and confidence to successfully implement a health and safety management system
- An increased understanding of liability insurance claims defence strategies.

### Who should attend?

The course is suitable for anyone with responsibilities for, or an interest in health and safety management, including:

- Senior managers and line managers
- Supervisory staff
- Premises and site managers
- Employees with specific health and safety responsibilities e.g. maintenance employees
- Managers with 'authority and influence' e.g. HR or contracts managers
- Union safety representatives / non-union representatives of employee safety.

### Course details

**The overall course is of four days in duration. This may be split into various formats such as:**

- 2 x 2 mid-week days on consecutive weeks (the most popular format)
- 1 x 4-day block
- 1 x day release over 4 weeks.

**The course consists of the following modules:**

- **Module 1** – Introduction to Health and Safety
- **Module 2** – Risk Assessment
- **Module 3** – Risk Control
- **Module 4** – Understanding Your Responsibilities (legal requirements and safety management systems)
- **Module 5** – Common Hazards (including specific risk assessments and control measures)
- **Module 6** – Accident Reporting and Investigation (including insurance liability claims defence)
- **Module 7** – Measuring Performance (inspections and auditing)

## IOSH Managing Safely

### Tailored to suit your needs

Although falling within the IOSH syllabus, the course content can be 'tailored' to meet each customer's exact requirements. Customers' own unique safety management systems and procedures can also be incorporated if required. Each delegate receives a course handbook produced by IOSH, a handout and information sheets. An end of course exam and project based on a risk assessment of the delegate's individual workplace completes the course.

### Course fees

Our fees for presenting the course are fully inclusive of all course materials and IOSH registration/certification fees and can be agreed based on the number of delegates and course format.

### Trainer details

All our trainers are Chartered Safety Practitioners, with practical knowledge and experience. Each has health and safety qualifications up to MSc level, as well as many specialist qualifications such as environmental management, fire safety and acoustics. Our trainers have been presenting IOSH Managing Safely since the 1990s and have delivered the course to a wide range of diverse business sectors including:

- Manufacturing
- Construction
- Engineering
- Commercial and retail
- Housing associations and care providers
- Education
- Police authorities

### Why choose Aegis?

- Aegis was established in 1994 and has achieved an enviable reputation for the highest standards of quality, service and value.
- Accessible location with ample parking and state of the art training facilities.
- We guarantee a 100% pass rate - in the unlikely event of a failure, we offer free re-sits until a pass is achieved.
- Our course content can be 'tailored' to meet each customer's exact requirements. Customer's own unique safety management systems and procedures such as risk assessment and inspection formats can also be incorporated if required.
- All our trainers have practical experience of 'hands-on' safety management, including fire safety, enforcement and the insurance industry. In addition to training experience, all are practising consultants with an extensive client portfolio.
